Customize Your Own Speaker !!

We present a special unprinted **BoomBox** including a pack of 6 MONTANA ACRYLIC MAKERS.

Now you can design your very own **BoomBox**

MONTANA BOOMBOX

DESIGN

Welcome to the new Old School!
The Berlin Boombox is designed by Berlin-based designer **Axel Pfaender**. He decided it was time for a cool and fun mobile speaker ... a sound system you want to show off, like back in the days.

A fresh approach to the design of mobile speakers.

Bringing together the classic **boombox** style with today's audio technology. The bold graphic black and white design makes **the Berlin Boombox** a real eye-catcher.

COMPATIBILITY

The Berlin Boombox is for everyone! It works with every smartphone* and mp3 player, because it connects to your device's headphone jack.

*including: iPhone 5, iPhone 4S, iPhone 3GS, iPod, Samsung Galaxy S4, Samsung Galaxy SIII, Nokia Lumia, HTC One, Huawei Ascend, Google Nexus 4, Moto X ...

You can also connect your laptop, computer, tablet, phablet, gaming console, turntable or even your vintage gameboy.

DIY KIT

The **Berlin Boombox** comes as a kit consisting of a die-cut cardboard structure and all electronic parts.

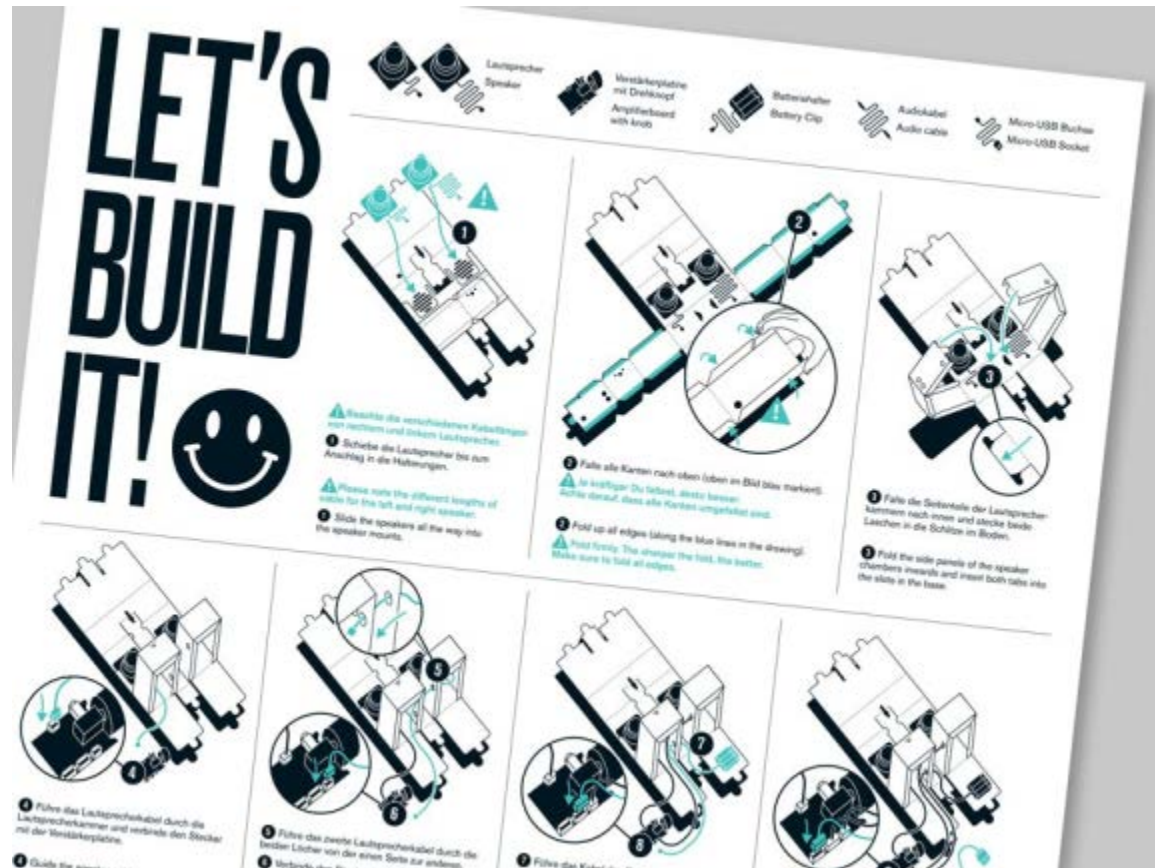

Assembly is easy, glue-free, tool-free and takes only a couple of minutes.

How to build it:

You don't need any no geeky knowledge to build the **Berlin Boombox**.

A beautifully designed manual is included with every **Berlin Boombox** kit and guides you step-by-step to complete your first DIY speaker.

QUALITY

Durability

The Berlin Boombox is made from the best available corrugated cardboard. It features a strong carrying handle and a beautiful aluminum knob for power and volume control.

Dedication to Detail

All parts are designed with a dedication to detail and manufactured with greatest possible level of precision.

Powerful Sound

The speakers and amplifier are German engineered by our partner MIVOC Pro. We have put a lot of effort into the cardboard construction to achieve the best possible sound experience.

SUSTAINABILITY

Less Garbage

The Berlin Boombox is made of recycled cardboard* and can itself be recycled. It only contains a small portion of plastic and electronic waste. With the packaging we also avoid unnecessary shrink-wrapping, plastic materials and the like.

*Brown color way: 100% recycled cardboard. Other colors: partially recycled cardboard.

Efficiency

The lightweight and flat packaging means less energy is used for shipping. Our class D amplifier is very energy-efficient, too: 3 AA batteries will give you 200 hours of music.

Supporting local Businesses

All design, screen-printing and production of the cardboard case is done locally in Berlin.

Packaging and logistics are done by Mosaik, a sheltered workshop in Berlin.

Modular Concept

The modular kit concept of **the Berlin Boombox** lets us send only the necessary replacement parts to our customers who can replace them themselves. This saves everyone money, nerves and energy.

We are sure that **the Berlin Boombox** is the most eco-friendly powered stereo speaker on the market.

TECH SPECS

DIMENSION → Width: 355 mm (14 inches)

Height: 250 mm (9.8 inches)

Depth: 120 mm (4.3 inches)

WEIGHT 850 g

AMPLIFIER → Stereo amplifier, Class D SMD, 2x5 watts, 92% efficiency
